

NAB 9. (New) A lithium flat battery according to claim 1 wherein the film building the housing parts is a metallic film.

10. (New) A lithium flat battery according to claim 9 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

A2 11. (New) A lithium flat battery according to claim 1 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

12. (New) A lithium battery according to claim 1 wherein the contact areas on one of the housing parts are larger than those on the corresponding other housing part and wherein the sealing material on the separator covers the larger contact areas.

13. (New) A lithium flat battery according to claim 12 wherein the film building the housing parts is a metallic film.

14. (New) A lithium flat battery according to claim 12 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

15. (New) A lithium flat battery according to claim 1 wherein the films building the battery parts present, at least on one side, a layer of electrolytically deposited copper particles.

16. (New) A lithium flat battery according to claim 15 wherein the film building the housing parts is a metallic film.

17. (New) A lithium flat battery according to claim 15 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

18. (New) A lithium battery according to claim 15 wherein the contact areas on one of the housing parts are larger than those on the corresponding other housing part and wherein the sealing material on the separator covers the larger contact areas.

19. (New) A lithium flat battery according to claim 1 wherein the sealant on the separator outreaches over the edge of the films building the battery at least in the area where the electrical connector tabs are located.

20. (New) A lithium flat battery according to claim 19 wherein the film building the housing parts is a metallic film.

21. (New) A lithium flat battery according to claim 19 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

22. (New) A lithium battery according to claim 19 wherein the contact areas on one of the housing parts are larger than those on the corresponding other housing part and wherein the sealing material on the separator covers the larger contact areas.

23. (New) A lithium flat battery according to claim 19 wherein the films building the battery parts present, at least on one side, a layer of electrolytically deposited copper particles.

24. (New) A lithium flat battery according to claim 1 wherein the separator presents the shape of a waffle comprising a peripheral rim and depressions accommodating the electrodes.

25. (New) A lithium flat battery according to claim 24 wherein the film building the housing parts is a metallic film.

26. (New) A lithium flat battery according to claim 25 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

ON ?  
SUBPANE 27. (New) A lithium flat battery according to claim 1 wherein the battery body built by the housing parts and the separator, but excluding the electrical connector tabs, is covered with an electrically insulating protective coating.

AD  
CONT. 28. (New) A lithium flat battery according to claim 27 wherein the inside of at least one of the two battery parts is coated in the area accommodating the thin-layer electrodes with an electrically conductive bonding material.

29. (New) A lithium flat battery according to claim 28 wherein the film building the housing parts is a metallic film.
